## **TUPPERWARE THE PRODUCT THAT KEEPS ON SAVING!!**

Our Micro Fiber Line can save you over \$130 a year from using cleaners and more paper towels and other cleaning supplies.

Our towels pick up 99% of microscopic particles such as bacteria instead of pushing it around. Microfibers have a positive charge that attracts the dust which has a negative charge. Therefore the dust and soil are held tightly and not easily redistributed during cleaning. They are good for 750 washes (that's a wash a day for two years!) and will not need to be replaced as often as other cloths.

Safe on flat screen TV's, computers & electronics, eyeglasses and sunglasses, fine collectibles, lamps, shades, cd's, auto interiors and exteriors, jewelry, floors, windows, mirrors. Just use a spray bottle of water instead of cleaners. This not only saves you money but helps the environment.

They absorb 10 times as much as normal towels. The dish towels continue to dry things even when it appears wet.

Cleaning and polishing are accomplished in one step which saves you time. They dry in 1/3 of the time in the dryer, reducing energy cost.

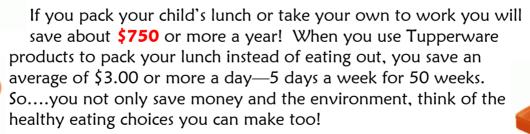

The multi purpose towels are perfect for swiffer type mops. Just tuck it in and go and it picks it all up. Save money from buying the inserts. With micro fiber you have no more stinky cloths from milk and other things because it comes right out.

The dust mitt is awesome for our ceiling fans..no more dust falling all over your already clean room or filling the air with more dust.

Don't forget the guys too! Men love to keep a dust mitt handy for cleaning their dashboard and car interiors!

Easy Care Instructions: Simply wash in warm water (never hot), no bleach and dry without dryer cloths. Hot water, bleach and dryer cloths can damage the microfibers and cause poor cleaning performance.

DID YOU KNOW....by the time a child is 17 years old they have used over 1700 baggies! Wow— think of the cost to you and the environment!

Even if you pack, The average person throws \$120 in the dump every year. So forget all those environmentally unfriendly (and

costly!) wrappers: baggies, paper towels, plastic wrap, wax paper, and aluminum foil—that you use to keep your food fresh—Instead use Tupperware sandwich keepers and be green—save lots of green, and no more squished sandwiches! With Tupperware you have life time wrappers which have a life time warranty. **See other side for more money saving ideas!**
